

The Problem

30+

Flat menu items with no hierarchy

Everything lives at root level — no grouping, no logic

Cognitive overload on every visit

Users cannot scan or self-select quickly

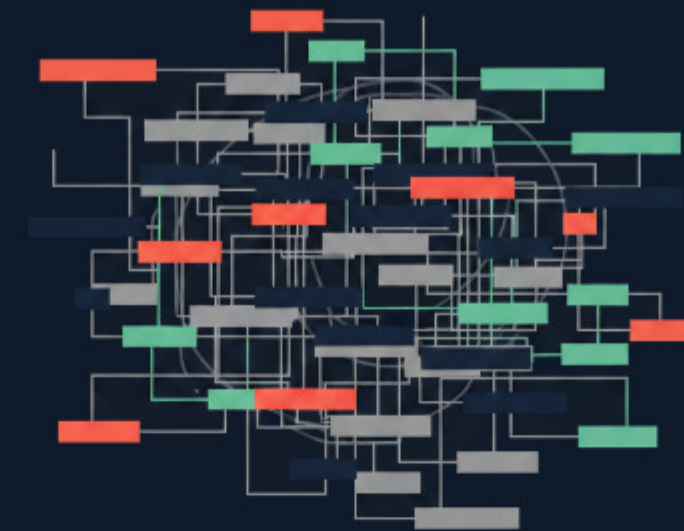

Need to make easier on potential buyers

Buyer intent is unaddressed in nav architecture

Compliance acronyms clutter main nav

ATO, HIPAA, FISMA compete with product pages

The Solution: Progressive Disclosure

No clear path to self-select by need

- 1 Collapse into 4 clean, logical buckets
- 2 Show broad categories first
- 3 Let users click deeper into specifics
- 4 Map to buyer intent: What, Where, Who, Why

Trust & Compliance

Why Trust Us

Pillar 1: Platform

What We Do

Clinical AI & Automation

- Ambient AI
- PCSIP
- Care Quality Reporting
- Case Management

Care Coordination & Flow

- Clinical Documentation
- Scheduling Optimization
- Video Management
- E-sitters

Patient Engagement

- Telehealth
- Patient Education
- CoreyPatient App

IoT & Facility Safety

- Asset & Staff Mgmt
- Hand Hygiene
- Patient Safety
- Staff Safety

Pillar 2: Use Cases

Where We Work

Emergency & Pre-Hospital

- Emergency
- Emergency Transport

Surgical & Perioperative

- Surgery
- Anesthesia
- Gastroenterology

Specialized Inpatient

- NICU
- Radiology
- Radiation Oncology
- Inpatient Care

Behavioral & Community

- Behavioral Health
- CARE Act Solution
- Post-Acute Care

Categorized by clinical environment — maps to how buyers think about their facility

Pillar 3: Markets

Who We Serve

Federal & Government Hospitals

Bypasses lengthy federal review due to ATO status

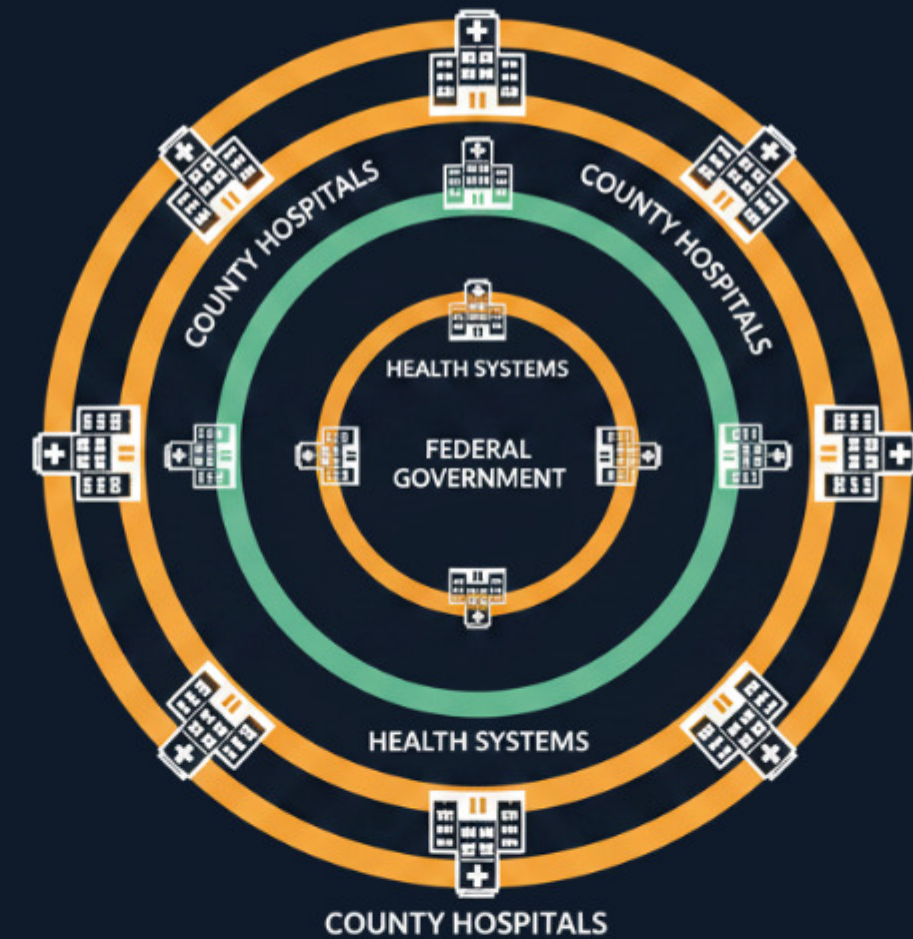

Health Systems & Educational Networks

Multi-facility deployments with training integrations

County & Rural Hospitals

Capacity-constrained facilities needing efficiency gains

Pillar 4: Trust & Compliance

Why Trust Us

Consolidated "About" section with dropdown:

- Our Story
- Partners & News
- Security & Compliance (dedicated page)

Key Shift

Move compliance acronyms (ATO, HIPAA, FISMA) out of root menu into a dedicated sub-page

Why It Works

Compliance is a trust signal, not a product. Nest it under credibility, surface it via trust bars elsewhere.

Social Proof Placement Strategy

PATIENT ENGAGEMENT / TELEHEALTH SECTION

"Core Mobile's telehealth platform transformed how we deliver care to our rural patients..."

— Dr. Kathryn Camille Holeyfield

SURGERY PATIENT FLOW USE CASE PAGE

"The scheduling optimization reduced our PACU wait times significantly..."

— PACU Manager

Principle

Insert testimonials contextually where they validate specific claims

Not isolated at the bottom of the page — embedded where they matter
